Interventional Cardiology Track (IC Track)

Dallas, Texas | Nov. 16–20, 2013

scientificsessions.org

Get the latest cutting-edge science at the AHA Interventional Cardiology program at Scientific Sessions

These exciting interactive sessions will be presented by world-renowned experts, and they’ll help you improve your clinical practice.

Don’t miss the state-of-the-art science offered through the IC Track, including:

- Preeminent abstracts highlighting the state of interventional cardiology research
- Updates from the latest practice-changing clinical trials
- Presentations, debates and discussions with a select group of leading international thinkers

Stay up-to-date with Scientific Sessions 2013 news at scientificsessions.org.

The 2013 IC Track is designed for interventional cardiologists, radiologists, clinical cardiologists, basic scientists, vascular medicine specialists, surgeons, cath lab technicians and other healthcare professionals. They include medical students and trainees, nurse practitioners, physician assistants, nurses and technicians with a special interest in the field of interventional and vascular medicine.

"This year’s AHA Interventional Program promises to continue delivering the highest-quality clinical, translational, and basic science through multidisciplinary presentations and highly interactive formats. Attendees will receive direct access to internationally recognized experts, the next generation of thought leaders, and innovative pioneers who continue to push boundaries in the field. With a comprehensive program in coronary, structural, and peripheral interventions, attendees will gain the necessary knowledge to administer the highest quality care to their patients."

Navin K. Kapur, MD
Division of Cardiology, Tufts Medical Center Molecular Cardiology Research Institute

The practice of interventional cardiology continues to require innovation in both the team care provided to patients and the technological advances applied to patients with complex disease. This year’s Scientific Sessions will again provide multiple ways for attendees to interact and understand interventional decision making while seeing the latest innovative breakthroughs.

Manesh R. Patel, MD, FAHA

We are thrilled with the spectacular program for this year’s AHA interventional track! Pulling together expertise from around the world in a variety of coronary, peripheral and structural topics, the programming committee has done a wonderful job engaging young talent and established experts. These sessions will certainly prove to be entertaining, while delivering an informative variety of information for us to bring back to our practices.

Duane S. Pinto, MD, MPH, FACC, FSCAI

Chair
